

SUHA SALEEM

A CSE student focused on data analytics and machine learning.
Experienced in building end-to-end data pipelines and dashboards
that turn raw data into structured, real-world solutions.

EDUCATION

B.Tech in Computer Science Engineering (AI & ML) | Minor-Business Management Aug 2023 - May 2027
Amity University Mumbai, Mumbai

- Relevant coursework - Machine Learning, Database Management Systems, Data Structures

Pre-University College (Grade 11 and 12) Sep 2020 - Apr 2022
Christ University, Bangalore

WORK EXPERIENCE

Software Development Intern, Progton Software Jun 2025 - Jul 2025

- Architected Python-based automated data processing engines and predictive time-series forecasting tools, optimizing automated code execution patterns.

Data Science - Apprenticeship, Girls Who Code Jun 2022 - Jul 2023

- Gained practical experience in Python, data analysis, data visualization, and machine learning concepts through a structured apprenticeship program.
- Optimized data workflows and delivered actionable insights using Pandas, NumPy, and Matplotlib.

PROJECTS

Attention Economy Intelligence Engine

- Engineered a business intelligence platform that analyzes consumer attention trends across AI productivity brands, transforming search-interest data into strategic growth indicators.
- Built a proprietary Attention Momentum Score and interactive Power BI dashboards to identify emerging market leaders and support data-driven decision-making.

Black Swan (Cascade Risk Engine)

- Developed a tensor-based systemic risk simulation framework that models cascading failures across multidimensional financial networks using graph propagation and fracture point detection.
- Built a real-time visualization dashboard using Python, NumPy, and JavaScript to analyze stress propagation, latency thresholds, and systemic collapse behavior in complex interconnected systems.

BaseForest2

- Developed a platform that uses CNNs to analyze high-resolution satellite imagery and identify deforestation for effective forest health monitoring.
- Built a scalable FastAPI system supporting real-time predictions, model retraining, and flexible deployment.

Solace Sanctuary - Mental Health and Workplace Analytics Dashboard

- Analyzed workforce datasets using exploratory data analysis (EDA) to isolate behavioral patterns driving employee burnout and digital fatigue.
- Built an interactive dashboard to map key stress factors and deliver data-backed retention insights.

SKILLS

- Languages:** Python, SQL, C++, JavaScript, HTML/CSS
- Analytics & Tools:** Power BI, Tableau, Excel, Pandas, NumPy, Matplotlib, Exploratory Data Analysis (EDA), Statistical Analysis, Time Series Forecasting, Git, GitHub, Jupyter Notebook, VS Code, FastAPI, Firebase

LEADERSHIP & ORGANIZING

- Placement Secretary, Student Council - Amity University Mumbai Aug 2025 - May 2026
- Core Member – Google Developer Student Club Oct 2024 - May 2025
